ABOUT

GJT SERVICES LTD

Solid Foundations, Straightforward Delivery

No two sites are the same. Ground conditions shift, access varies, and deadlines matter. At GJT Services Ltd, we take the time to understand the job, plan the work properly, and get on with it without unnecessary fuss.

Whether you need a standalone package delivered from scratch or dependable plant and groundwork to support a wider build, we work alongside you from day one through to sign-off.

Based in Wiltshire, we partner with main contractors, developers, rural landowners, and private clients across the region.

Why Work With Us

Problem-Solving Approach
We adapt quickly when ground or site conditions change, keeping works moving forward.

Cross-Sector Experience
Proven capability across commercial builds, private plots, solar arrays, and working farms.

Clear Communication
Regular updates, realistic schedules, and straightforward pricing with no hidden surprises.

One Direct Point of Contact
You deal directly with the people managing and executing the work on site.

GJ SERVICES LTD

GROUNDWORKS

Getting the Ground Ready from Day One

Everything built above relies on what happens beneath it. We provide clean, accurate site preparation and enabling works designed to keep your programme moving smoothly.

Our Groundwork Capabilities

- Site clearance, muck away, and cut-and-fill earthworks
- Foundation excavation and strip footings
- Deep drainage, soakaways, and surface-water management
- Service trenches, ducting, and utility runs
- Concrete slabs, foundations, and sub-base prep
- Hardstanding, kerbing, and ground reinstatement

A properly prepared site gives every trade that follows the clean start they need.

GJT SERVICES LTD

CIVIL ENGINEERING

Practical Infrastructure Support for Active Sites

We deliver essential civil works that keep broader developments on schedule. Working alongside site agents, engineers, and other trades, we ensure every stage is completed accurately to specification.

Core Civil Services

- Infrastructure enabling and bulk earth movement
- Access roads, haul routes, and durable hardstanding
- Surface drainage, attenuation systems, and service runs
- Reinforced concrete slabs and equipment bases
- Plant-supported works tailored to build phases

Dependable civil engineering delivered around your site limits, specifications, and deadlines.

SOLAR SERVICES

Civils and Ground Preparation for Renewable Projects

Solar arrays demand efficient access, clean trenches, and stable footings across varied terrain. We provide responsive civil support to keep your installation schedule on track and minimise site impact.

What We Deliver

- Temporary and permanent haul roads and access tracks
- High-volume cable trenching, ducting, and backfilling
- Substation pads, inverter plinths, and equipment bases
- Perimeter ditching, security boundary prep, and earthworks
- Final site reprofiling and environmental reinstatement

Reliable infrastructure to keep renewable energy developments moving smoothly.

GJ SERVICES LTD

AGRICULTURAL SERVICES

Built Tough for Working Farms and Estates

Farms and rural businesses need durable, practical groundworks that can take heavy machinery, handle wet winters, and withstand daily wear. We build solutions designed for working land.

Rural and Estate Works

- All-weather tracks, passing bays, and yard hardstanding
- Land drainage, ditch clearing, and run-off management
- Shed bases, concrete yards, and silage clamps
- Water troughs, pipe trenches, and power ducting
- General site clearance, muck store groundworks, and reprofiling

Practical rural improvements built around the land and the way you run it.

GJ SERVICES LTD

FLEXIBLE PACKAGES. CLEAR RESULTS.

We fit around how you work, whether taking complete ownership of a sub-package or working on day-rate hire to support your existing crew.

Clients We Support

- Main contractors and regional developers
- Commercial businesses and industrial facilities
- Solar contractors and EPC developers
- Farm managers, landed estates, and rural smallholders
- Self-builders and private homeowners

How We Work

01 Initial Site Review
Tell us the scope, target dates, and ground conditions.

02 Clear Proposal
We supply a transparent quote and an efficient plan of attack.

03 Delivery
Plant on-site on time, works completed to spec, and no mess left behind.

Working collaboratively to deliver practical solutions for every project.
